Air Tightness - Accident or Choice?

Presented by Hayward

The presentation will cover 4 synergistic learning objectives that contribute to the design of an energy efficient home focused on occupant health & comfort:

1. Air Sealing and moisture management with a vapor permeable, fully adhered, water resistant barrier system, (WRB)
2. Health and comfort benefits of mechanical ventilation with HRV/ERV
3. Significant advantages of radiant heating and cooling in walls and ceilings
4. Attributes of dynamic glazing in residential & light commercial applications

Program by Brian Larkowski - Brian Larkowski has been involved in the construction industry for 30 years and is currently the Sales Manager for Hayward Healthy Home. He is actively involved in training and consulting on projects that are geared toward synergistic, sustainable solutions with a focus on building science and occupant health.
